Title : METHOD AND APPARATUS FOR CUTTING BODIES HAVING A NON-CIRCULAR CROSS SECTION

Assistant Commissioner for Patents  
Washington, DC 20231

AMENDMENT

Responsive to the Office Action mailed 06/03/98, please  
amend as follows:

01  
--6. (Three Times Amended) A hand-held tool for shearing by transverse forces a body having a non-circular cross-section by the application of torsional force, said tool comprising an upper shearing element and a lower shearing element, each of said shearing elements having an upper side and a lower side, said upper shearing element having opposing cutting edges at its lower side and said lower shearing element having opposing cutting edges at its upper side, said sides directly touching each other at said edges, and said tool further comprising means for rotating said elements counter to one another about an axis to apply a torsional shearing force on the body in a plane transverse to the longitudinal axis of the body, whereby said rotating axis cuts the plane extending between said cutting edges of said shearing elements and said means for
